PEP - ENVIRONMENTAL STATEMENT MEMORANDUM NO. ESM94-10

To: Heads of Bureaus and Offices

From: Director, Office of Environmental Policy and Compliance

Subject: Federal and Federal-State Agencies with Jurisdiction by Law or Special Expertise on Environmental Quality Issues

Attached is Appendix II to the CEQ Regulations for implementing the procedural provisions of NEPA (40 CFR 1500 - 1508), which lists Federal and Federal-State agencies with jurisdiction by law or special expertise on environmental quality issues.

This appendix identifies those agencies to be consulted and coordinated with in the NEPA process. It must be used in determining lead and cooperating agencies, scoping and inviting comments (40 CFR 1501.5, 1501.6, 1501.7, and 1503.1), and is useful in determining other environmental review and consultation requirements (40 CFR 1502.25).

This memorandum replaces ESM94-3.

Appendix II—Federal and Federal-State Agencies With Jurisdiction by Law or Special Expertise on Environmental Quality Issues

This appendix is a compilation of Federal and Federal-State agencies with jurisdiction by law, a statutorily mandated consultative role, or special expertise on environmental quality issues. Both the public and private sectors and governmental agencies can use this list as a reference guide to facilitate their participation in and compliance with NEPA process.

The appendix is organized into four broad categories: pollution control, energy, land use, and natural resource management. Because most actions involve environmental issues falling into more than one of these categories, users should consult all pertinent entries.

The areas of special expertise are listed in parentheses following the agency name. They are intended to provide examples rather than define the limits of an agency's total expertise in that area.

The areas of jurisdiction by law and statutorily mandated consultations are listed below each appropriate agency or component. Entries dealing with jurisdiction by law relate to that agency's authority to approve, deny, or finance all or part of a proposal and include permits and licenses. Because experience in implementing NEPA has proven that identification of an agency's statutorily mandated consultative role is of equal significance to users of this list, those responsibilities are now specifically cited and include such authorities as the National Historic Preservation Act of 1966 (16 U.S.C. Sec. 470 *et seq.*), the Fish and Wildlife Coordination Act (16 U.S.C. Sec. 661 *et seq.*), and the Endangered Species Act of 1973 (16 U.S.C. Sec. 1531 *et seq.*). Because laws are amended and new laws enacted, the responsibilities identified in this appendix may change or new ones may be added. Hence, the definitive responsibility of an agency depends on the then current law and not on this index.

The Council on Environmental Quality has prepared this list to supplement its NEPA regulations and believes that it will be helpful in the following ways:

First, the Council's NEPA regulations require the Federal agency having primary responsibility for preparing an environmental impact statement (EIS) under NEPA (the lead agency) to determine whether any other Federal agencies have jurisdiction by law or special expertise with respect to any environmental effects involved in a proposal for legislation or other major Federal action significantly affecting the human environment. 40 CFR 1501.5(a), 1501.6(a), 1501.7(a). The Federal lead agency must, early in the NEPA process, request the participation of Federal cooperating agencies with jurisdiction by law or special expertise concerning the proposal. 40 CFR 1501.6(a), 1501.7(a). The lead agency and those involved in the "scoping process" (see 40 CFR 1501.7) may use this list to help determine which other Federal agencies should be requested to participate as cooperating agencies in the NEPA process. The list will also be helpful to the lead agency in determining which agencies should receive copies of the draft environmental impact statement for review and comment. 40 CFR 1503.1.

Second, this compilation will prove useful to those whose activities or proposed actions require Federal regulatory approvals by facilitating the identification of:

- Those Federal agencies with the authority to issue applicable permits, licenses or other Federal regulatory approvals, and
- Those Federal agencies that have a statutorily mandated consultative role that must be carried out before a decision is made.

Third, a major goal of NEPA and the CEQ regulations is to encourage public participation in agency decisionmaking. 40 CFR 1500.2(d). Individuals, citizen groups and State and local governments who are interested in an environmental issue may use the list to help identify those agencies that have jurisdiction by law over or special expertise in the subject matter of a proposal. Those interested may then contact the potentially involved agencies to obtain information on the issues and to participate in the NEPA process.
